Competent Authority	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 10. October 2023, 09:07 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term The product has a fixed term and matures on the Redemption Date.

Objectives The aim of this product is to grant the investor a specific entitlement at predefined conditions. The product has a fixed term and matures on the Redemption Date. It allows the investor to receive a cash payment in the Product Currency at least equal to the Capital Protection Amount on the Redemption Date, as well as a participation (see below Upside Participation Rate) in the positive performance of the Underlying up to the Knock-Out Level. The redemption of the product depends on the Final Fixing Value of the Underlying and of the occurrence of a Knock-Out Event. A 'Knock-Out Event' occurs, if the price of the Underlying touches or exceeds the Knock-out Level at least once between Initial Fixing Date and Final Fixing Date. The redemption modalities are as follows:

- If a Knock-Out occurs, the investor receives a redemption amount on Redemption Date corresponding to the Capital Protection plus the Rebate payment.
- If a Knock-Out Event did not occur and if the Final Fixing Value is below the Exercise Price, the investor receives a redemption amount on the Redemption Date that corresponds to the Capital Protection.
- If a Knock-Out Event did not occur and if the Final Fixing Value is at or above the Exercise Price but below the Knock-Out Level, the investor receives a redemption amount on the Redemption Date corresponding to the Denomination multiplied by the Final Fixing Value divided by the Exercise Price and multiplied by the Upside Participation Rate. I.e. the redemption amount is proportionally linked to the positive performance of the Underlying.

The investor has no entitlements arising from the underlying and/or components of the underlying (e.g. voting rights and dividends).

The risk and return profile of the product described above will change if the product is sold before the Redemption Date.

Product information

Denomination	USD 1,000.00	Value Date	16/10/2023
Issue price	100.00% of Denomination	Last Trading Date	09/10/2024

Underlying	Initial Fixing Date	Initial Fixing Value	Final Fixing Date	Final Fixing value
Arm Hldg Unsp ADR	09/10/2023	USD 54.25	09/10/2024	Closing price on NASDAQ GS on 09/10/2024

According to the product terms and conditions, in case of an extraordinary event adjustments may be made to the product and the Issuer may terminate the product early. These events are specified in the product terms and conditions, and mainly relate to the Underlyings, the product and the Issuer. In such cases, the redemption amount may be significantly lower than the purchase price. The Investor should therefore be prepared to accept a partial or total loss of his investments. In addition, the investor bears the risk of a termination at a time that is unfavourable for him and that he can only reinvest the redemption amount at less favourable conditions.

Target Market The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear no losses of the invested capital and places value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk < **1** **2** **3** **4** **5** **6** **7** > Higher risk

The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 2 on a scale of 1 to 7, where 2 corresponds to risk class a low. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are**

credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above. You are entitled to receive back at least 100% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	16/10/2024 (maturity)	
Example Investment:	USD 10,000.00	If you exit at the end of the recommended holding period
Scenarios		
Minimum	USD 10,000. The return is only guaranteed if you hold the product until the end of the Recommended Holding Period.	
Stress	What you might get back after costs	USD 10000
	Average return each year	0.00 %
Unfavourable	What you might get back after costs	USD 10000
	Average return each year	0.00 %
Moderate	What you might get back after costs	USD 10500
	Average return each year	4.89 %
Favourable	What you might get back after costs	USD 10500
	Average return each year	4.89 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

This product cannot be cashed in. If you exit the investment earlier than the recommended holding period you do not have a guarantee and you may have to pay extra costs.

What happens if Zürcher Kantonalbank Finance (Guernsey) Ltd is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000.00 is invested.

	If you exit at the end of the recommended holding period
Total costs	USD 0
Cost impact (*)	0.00%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

Composition of costs

One-off costs upon entry or exit		If you exit at the end of the recommended holding period
Entry costs	These costs are included in the price you pay.	USD 0
Exit costs	0.00% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	USD 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	There are no other ongoing costs for this product.	n/a
Transaction costs	There are no transaction costs for this product.	n/a

How long should I hold it and can I take money out early?

Recommended holding period: 16/10/2024 (maturity) The objective of this product is to provide the investor with the entitlement described above under "What is this product?" provided the product is held to maturity.

The investor has the option to redeem the product by selling the product to the product manufacturer. The product manufacturer endeavors to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally obliged to do so. If you sell the product before the end of the recommended holding period, the amount you then receive may be less, even substantially, than the amount you would otherwise have received.

Stock market listing	no	Last Exchange Trading Day	n/a
Smallest tradeable unit	USD 1,000	Price quotation	quoted in per cent

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website www.zkb.ch/finanzinformationen.
