Governing Law/ Jurisdiction	Swiss Law/Zurich
Profit and Loss Expectations at Maturity	2. Profit and Loss Expectations at Maturity Warrants offer the opportunity to generate profits through price changes in the Underlying via a Leverage effect. The profit potential for Call Warrants is basically unlimited. The loss potential is limited to the capital invested. Due to the Leverage effect, the value of a Warrant changes more strongly than the value of the Underlying. The value of a Call Warrant generally decreases if the price of the Underlying decreases. The value of a Warrant may also decrease if the price of the Underlying remains unchanged because the time value and/or volatility decreases or supply and demand develop unfavorably.
	3. Material Risks for Investors
lssuer Risk	Obligations under these products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this product.
Specific product risks	Warrants involve the risk of losing the initial capital paid (Issue Price) altogether. They are intended only for experienced investors who understand and are able to bear the associated risks. If the Warrants are denominated in a currency other than the Underlying, the investor bears the exchange rate risks, if any, between the product Currency and the currency of the Underlying. Warrants do not yield any current income. If there is no increase in the price of the Underlying and/or volatility, a Call Warrant generally loses value and may expire worthless at expiry. The maximum risk is therefore the loss of the capital invested.
Madifiantiana	4. Additional Terms
Modifications	If an extraordinary event as described in the Base Prospectus occurs in relation to an Underlying/Component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these

Change of Obligor	products at its own discretion in such way, that the economic value of the products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the products prior to the occurrence of the extraordinary event. The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned products which the previous Issuer owed in respect of these products, (ii) the Zürcher Kantonalbank enters into a Keep-Well Agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of products and the assumption of the obligations under the assigned products.
