If a Knock-in Event occurs, the investor will receive a physical delivery of a number of Underlyings as defined in Ratio of the Underlying having the largest negative performance. Therefore, the investor may suffer a partial or total loss. The acquisition price of the delivered Underlyings is 100.00% of the Initial Fixing Value. This negative performance is reduced by the guaranteed Coupons paid out during the term.

The table above is valid at maturity only and is by no means meant as a price indication for the present product throughout its lifetime. Additional risk factors may have a significant impact on the value of the product during the term. The price quoted on the secondary market can therefore deviate substantially from the above table. For this table it was assumed, that Alphabet Inc was the worst performing Underlying. This selection is just a representative example of the possible alternatives. Currency risks between the Underlyings and the Product are not considered in the table.
