**Key elements of the product** The product pays out coupons on defined dates during the term. If the Final Fixing Value of the Underlying is at or above the Cap Level, the investor receives a cash redemption in the amount of the Denomination. If the Final Fixing Value of the Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings.

## Tax aspects

The product is considered as transparent and has predominant one-off interest (IUP). The Coupon of 10.4628% p.a. is divided into a premium payment of 9.118% p.a. and an interest payment of 1.3448% p.a.. The option premium part qualifies as capital gain and is not subject to Swiss income tax for private investors with Swiss tax domicile. The interest payment is subject to income tax and is determined in compliance with the 'modifizierte Differenzbesteuerung' tax rule based on the ESTV Bondfloor Pricing method. The Swiss withholding tax is not levied. In the case of physical delivery of the Underlying at maturity, the federal securities transfer stamp is levied on the basis of the Cap Level. The Federal securities transfer stamp tax is not levied on secondary market transactions.

The product may be subject to further withholding taxes or duties, in particular under the rules of FATCA or Sect. 871(m) U.S. Tax Code or foreign financial transaction taxes. All payments from this product are made after deduction of any withholding taxes and levies. The information above is a summary only of the Issuer's understanding of current law and practice in Switzerland relating to the taxation of these products. The relevant tax law and practice may change. The Issuer does not assume any liability in connection with the above information. The tax information only provides a general overview and can not substitute the personal tax advice to the investor.

## Profit and Loss Expectations at Maturity

### 2. Profit and Loss Expectations at Maturity

ZKB Reverse Convertible

Value Underlying	Percent	Redemption	Performance in %
CHF 163.28	-30%	CHF 36307.85	-27.38%
CHF 186.6	-20%	CHF 41307.85	-17.38%

CHF 279.9	20%	CHF 51307.85	2.62%
CHF 303.23	30%	CHF 51307.85	2.62%

If the Final Fixing Value of the Underlying is at or above the Cap Level, the performance of the product is always given by the Coupons paid out during the term. However, if the Final Fixing

Value of the Underlying is below the Cap Level, the investor will receive a physical delivery of a number of Underlyings as defined in Ratio. Therefore, the investor may suffer a partial or total loss. The acquisition price of the delivered Underlyings is 100.00% of the Initial Fixing Value. This negative performance is reduced by the guaranteed Coupons paid out during the term. The table above is valid at maturity only and is by no means meant as a price indication for the present product throughout its lifetime. Additional risk factors may have a significant impact on the value of the product during the term. The price quoted on the secondary market can therefore deviate substantially from the above table. Currency risks between the Underlying and the Product are not considered in the table.

### 3. Material Risks for Investors

#### Issuer Risk

Obligations under these products constitute direct, unconditional and unsecured obligations of the Issuer and rank pari passu with other direct, unconditional and unsecured obligations of the Issuer. The value of the product not only depends on the performance of the Underlying and other developments in the financial markets, but also on the solvency of the Issuer, which may change during the term of this product.

#### Specific product risks

Structured products are complex financial instruments, which entail considerable risks and, accordingly, are only suitable for investors who have the requisite knowledge and experience and understand thoroughly the risks connected with an investment in these structured products and are capable of bearing the economic risks. The loss potential of an investment in ZKB Reverse Convertible in the case of a title delivery is limited to the difference between the purchase price of the product and the cumulative value of the number of Underlyings as defined in Ratio. The Coupon, which is paid out in any case, reduces the loss of the product compared to a direct investment in the Underlying. The product is denominated in CHF. If the investor's reference currency differs from the CHF, the investor bears the risk between the CHF and his reference currency.

### 4. Additional Terms

#### Modifications

If an extraordinary event as described in the Base Prospectus occurs in relation to an Underlying/Component of the Underlying or if any other extraordinary event occurs, which makes it impossible or particularly cumbersome for the Issuer, to fulfill its obligations under the products or to calculate the value of the products, the Issuer shall at its own discretion take all the necessary actions and, if necessary may modify the terms and conditions of these products at its own discretion in such way, that the economic value of the products after occurrence of the extraordinary event corresponds, to the extent possible, to the economic value of the products prior to the occurrence of the extraordinary event.

#### Change of Obligor

The Issuer is entitled at all times and without the consent of the investors to assign in whole (but not in part) the rights and claims under individual products or all of them to a Swiss or foreign subsidiary, branch or holding company of the Zürcher Kantonalbank (the "New Issuer") to the extent that (i) the New Issuer assumes all of the obligations arising out of the assigned products which the previous Issuer owed in respect of these products, (ii) the Zürcher Kantonalbank enters into a Keep-Well Agreement with the New Issuer with terms equivalent to the one between the Zürcher Kantonalbank and Zürcher Kantonalbank Finance (Guernsey) Limited, (iii) the New Issuer has received from the supervisory authorities of the country in which it is domiciled all necessary approvals for the issue of products and the assumption of the obligations under the assigned products.

#### Market Disruptions
