-	Key Information Document

This document was created on 31. October 2025, 22:26 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term This product has no fixed maturity. You have however the right to redemption of a redemption amount depending on the performance of the Underlying on specified dates, provided that either the Issuer exercises its Redemption right or you exercise your Right of return (as defined below).

Objectives The objective of this product is to give you the option of participating indefinitely in the positive performance of an underlying (see below), less certain fees and costs (as specified below). The product replicates the performance of the Underlying and is therefore comparable to a direct investment in the Underlying in terms of risk. By investing in this product, investors expect an uptrend in the Underlying. Depending on price development, the price of the product may be higher or lower than the Issue price (as defined below).

Underlying: SXI Real Estate® Funds Broad NR, Performanceindex (ISIN: CH0468775033)

Calculation method of the redemption amount (Redemption Method): As noted below, the product does not have a maturity date.

However, the investor can get his investment back if he exercises his right of return. In addition, the Issuer may redeem the product by exercising his redemption right (see below). In each of these cases, the investor will receive a payment equal to the Final Fixing Value of the Underlying, as determined on the Relevant Exercise Date (see below), less specific fees and multiplied by the Ratio ("redemption amount"). You will incur a loss if the redemption amount is lower than the purchase price. The investor has no entitlements arising from the Underlyings and/or Components of the Underlying (e.g. voting rights and dividends).

(Maturity)

Relevant Exercise Date The exercise date on which the redemption amount is determined due to an exercise of the redemption

right or right to return.

Redemption right of

Right of return of the

Yes, as described below

Yes, as described below

Right of return (of the investor): The investor has the right to return the products they hold on the exercise dates for the first time on 15. December 2019. On the Relevant Exercise Date, the redemption amount will be determined as set out in the "Method for calculating the redemption amount" section. The declaration of intent to exercise the right of return must be received no later than 5 calendar days prior to the respective exercise date, and must be sent directly to Zürcher Kantonalbank, Sales Structured Products Department, IHHV, P.O. Box 8010 Zurich, or e-mailed to derivate@zkb.ch and communicated via the investor's custodian bank.

Redemption right (of the Issuer): The issuer has the right to redeem the outstanding products on a semi-annually basis on the 15th of June and December, for the first time on 15. December 2019 (and if this is not a banking day at the registered office of the Issuer, on the following banking day "exercise days"). On "Relevant Exercise Date", the redemption amount will be determined as set out in the "Method for calculating the redemption amount" section. The announcement, and with it the declaration of intent to exercise the redemption right, will be made with a notice period of 20 calendar days on the official publication channel of the SIX Swiss Exchange as well as on the website of Zürcher Kantonalbank.

The Product also provides that the Issuer may terminate the Product early if certain extraordinary events occur. These events essentially relate to the product, the Issuer and the Underlying. The amount you receive in the event of such an extraordinary early termination is different from the amount you have invested and may be lower. Investors should therefore be prepared to suffer a partial or total loss of their investments. In addition, you bear the risk that notice is given at a time that is unfavourable for you and that you can only reinvest the notice amount on less favorable terms.

Redemption: Repayment due to Redemption by the Issuer or return by the investor will be effected with a value date of five banking days after the relevant exercise date.

The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a long-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk 2 5 6 Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how

The summary risk indicator is a quide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 3 on a scale of 1 to 7, where 3 corresponds to risk class a Tracker_031122_1342_07976

Zürcher Kantonalbank Key Information Document

medium-low. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future

Recommended holding	5 years		.,
period:	- 1		
Example Investment:	CHF 10,000.00		
		If you exit after 1 year	If you exit at the end of the recommended holding period
Scenarios			
Minimum	There is no mimimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 5900	CHF 4100
	Average return each year	-41.14 %	-16.34 %
Unfavourable	What you might get back after costs	CHF 8250	CHF 7070
	Average return each year	-17.55 %	-6.70 %
Moderate	What you might get back after costs	CHF 10260	CHF 11480
	Average return each year	2.61 %	2.79 %
Favourable	What you might get back after costs	CHF 12680	CHF 18130
	Average return each year	26.89 %	12.62 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product - e.g. in the event of insolvency (inability to pay / overindebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the capital invested is possible. As a debt instrument, the product ist not subject to any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10,000.00 is invested.

	If you exit after 1 year	If you exit at the end of the recommended holding period
Total costs	CHF 30	CHF 174
Cost impact (*)	0.30%	0.31% p.a.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.10 % before costs and 2.79 % after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year	
Entry costs	These costs are included in the price you pay.	CHF 0	
Exit costs	0.00% of your investment before it is paid out to you. These costs only apply CHF 0 if you exit before maturity of the product.		
Ongoing costs taken each year			
Management fees and other administrative or operating costs	0.3% of the value of your investment per year.	CHF 30	
Transaction costs 0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.		· · · ·	

How long should I hold it and can I take money out early?

Recommended holding period: 5 years The average investor holds this type of product for about 5 years. Furthermore, this period promotes comparability with other investment products without a fixed term. The term of the product is indefinite. However, the product grants the investor a right of return as defined in the Final Terms of the product.

in addition, the investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product overthe-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.

Stock market listing	SIX Swiss Exchange	Last Exchange Trading Day	n/a	
Smallest tradeable unit	1 debt security(ies)	Price quotation	quoted in units	
In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product				

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website www.zkb.ch/finanzinformationen.
