

Key Information Document

CH0506591459 (the product)

Purpose This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of the Product	ZKB Tracker Zertifikat dynamic on Baryon US Equity Portfolio Sustainable Growth
ISIN	CH0506591459 (the product)
Manufacturer	Zürcher Kantonalbank, our website: zkb.ch/finanzinformationen , for more information call us on +41 (0) 44 293 66 65.
Issuer	Zürcher Kantonalbank
Competent Authority	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 03. July 2025, 21:21 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term This product has no fixed maturity. You have however the right to redemption of a redemption amount depending on the performance of the Underlying on specified dates, provided that the Issuer exercises its Redemption right (as defined below).

Objectives This product is a structured debt instrument issued by the Issuer whose performance depends on a notional basket ("Baryon US Equity Portfolio Sustainable Growth" – the "Underlying"), whose Components are selected by the Investment Manager. The Title Universe consists of US stocks and a liquidity component. Liquid american options on US stocks can also be used. The option exposure is always covered - either through liquidity (for short puts) or through equity exposure (short calls). The liquidity component is held in USD cash or in the form of a USD money market ETF (liquidity management intent) and is less than 50% at all times. The ETF must have a CH distribution licence. The Underlying constituents are listed at a recognized exchange (World Federation of Exchanges or FESE (Federation of European Securities Exchanges)). The current composition of the Underlying can be found under www.zkb.ch/strukturierteprodukte. Depending on price development, the price of the product may be higher or lower than the Issue price (as defined below).

Underlying: The underlying is a notional basket of sufficiently liquid and tradeable shares and a liquidity component denominated in USD ("underlying components"), actively constituted by the Investment Manager in accordance with their qualified assessment of the market and managed by them during the life of the product in accordance with a discretionary and dynamic investment strategy. Restrictions may apply to the inclusion of eligible underlying components in certain circumstances.

The product replicates the performance of the Underlying. The sum of the weightings of the Underlying components equals 100%. Negative weightings of the underlying components are not permitted. Any rebalancing of the Underlying and weighting of the Underlying components ("Rebalancing") will be made in accordance with the investment strategy at the average of the prices of the Underlying components obtained by the Issuer. The potential income attributable to the Underlying components (e.g. dividends, interest or other distributions) is generally reinvested (after deduction of any withholding taxes and duties) by adjusting the weighting of the relevant Underlying components.

The investment strategy, the universe of securities and the rebalancing are defined in more detail in the Final Terms and can be found in the section "Other relevant information" below. The current composition of the Underlying can be found at www.zkb.ch/finanzinformationen.

If an extraordinary event occurs, e.g. with respect to the Underlying the Issuer may at its discretion take all necessary steps and, if necessary, adjust the terms and conditions of the product so that the economic value of the product after the occurrence of the event corresponds as much as possible to the economic value of the product prior to the occurrence of the event.

Calculation method of the redemption amount (Redemption Method): As noted below, the product does not have a maturity date.

However, the Issuer may redeem the product by exercising his redemption right (see below). In either case, the investor will receive a payment equal to the sum of the weighted value of the underlying components, as determined on the Relevant Exercise Date (see below), less specific fees and multiplied by the Ratio ("redemption amount"). You will incur a loss if the redemption amount is lower than the purchase price.

Product information

Issue price	USD 100.00/100.00% of the Value of the Underlying on Initial Fixing Date	Final Fixing Date/ Final Fixing Level	On the relevant Exercise Date (Open End)
Denomination	USD 100.00	Redemption Date (Maturity)	5 Banking Days after the Relevant Exercise Date
Value of the Underlying Ratio	USD 100.00 on Initial Fixing Date 1 Product corresponds to 1 Underlying(s)	Relevant Exercise Date	The exercise date on which the redemption amount is determined due to the exercise of the redemption right.
Trading units	1 debt security(ies)	Redemption right of the Issuer	Yes, as described below
Product Currency	US-Dollar (USD)	Lead Manager/ Calculation Agent	Zürcher Kantonalbank, Zurich
Currency hedging	n/a	Investment Manager	Baryon AG, Zürich
Mode of settlement	cash settlement		
Initial Fixing Date/ Initial Fixing Level	07/07/2020, closing prices of the Underlying components on the reference exchange(s)		
Value Date	14/07/2020		

Redemption right (of the Issuer): The issuer has the right to redeem the outstanding products on a daily basis on banking days at the registered office of the Issuer (the "exercise days"), for the first time on 16. December 2020. On "Relevant Exercise Date", the redemption amount will be determined as set out in the "Method for calculating the redemption amount" section. The announcement, and with it the declaration of intent to exercise the redemption right, will be made with a notice period of 366 calendar day(s) on the website of Zürcher Kantonalbank.

The Product also provides that the Issuer may terminate the Product early if certain extraordinary events occur. These events essentially relate to the product, the Issuer and the Underlying. The amount you receive in the event of such an extraordinary early termination is different from the amount you have invested and may be lower. Investors should therefore be prepared to suffer a partial or total loss of their investments. In addition, you bear the risk that notice is given at a time that is unfavourable for you and that you can only reinvest the notice amount on less favorable terms.

Redemption: Repayment due to Redemption by the Issuer will be effected with a value date of five banking days after the relevant exercise date.

Target Market

The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a long-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk < **1** **2** **3** **4** **5** **6** **7** > Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 4 on a scale of 1 to 7, where 4 corresponds to risk class a medium. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: 03/07/2030 (example period)

Example Investment: USD 10,000.00

		If you exit after 1 year	If you exit at the end of the recommended holding period
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 4260	USD 2010
	Average return each year	-57.27 %	-27.46 %
Unfavourable	What you might get back after costs	USD 7760	USD 9890
	Average return each year	-22.35 %	-0.23 %
Moderate	What you might get back after costs	USD 10810	USD 20350
	Average return each year	8.07 %	15.25 %
Favourable	What you might get back after costs	USD 15370	USD 50630
	Average return each year	53.56 %	38.27 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. In particular, the figures are based on reasonable assumptions regarding the incurrence of fees charged for rebalancing the Underlying (representing 0.10% of the relevant notional transaction value) as well as annual fees (an administration fee of 0.20% per annum).

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000.00 is invested.

	If you exit at the end of the recommended holding period
Total costs	USD 456
Cost impact (*)	0.54% p.a.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 15.79 % before costs and 15.25 % after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	These costs are included in the price you pay.	USD 29
Exit costs	0.95% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	USD 95
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.25% of the value of your investment per year.	USD 25
Transaction costs	0.07% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 7

How long should I hold it and can I take money out early?

Recommended holding period: 5 years The average investor holds this type of product for about 5 years. Furthermore, this period promotes comparability with other investment products without a fixed term. The term of the product is indefinite. The product does not grant the investor any early right of return. For that reason, investors must be prepared to remain invested for the recommended holding period.

The investor has the option to redeem the product by selling the product to the product manufacturer. The product manufacturer endeavors to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally obliged to do so. If you sell the product before the end of the recommended holding period, the amount you then receive may be less, even substantially, than the amount you would otherwise have received.

Stock market listing	no	Last Exchange Trading Day	n/a
Smallest tradeable unit	1 debt security(ies)	Price quotation	quoted in units

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website www.zkb.ch/finanzinformationen.
