

Key Information Document

CH1139771336 (the product)

Purpose This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of the Product	ZKB Tracker Certificate dynamic on Migros Bank Global Quality Select
ISIN	CH1139771336 (the product)
Manufacturer	Zürcher Kantonalbank, our website: https://zertifikate.zkb.ch/EN , for more information call us on +41 (0) 44 293 66 65.
Issuer	Zürcher Kantonalbank
Competent Authority	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 08. June 2026, 22:36 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type Uncertificated securities issued in the form intermediated Securities (Bucheffekten), governed by Swiss law.

Term The product has a fixed term and matures on the Redemption Date. You have the right to redemption of a redemption amount depending on the performance of the Underlying on specified dates, provided that either the Issuer exercises its Redemption right or you exercise your Right of return (as defined below).

Objectives This product is a structured debt instrument issued by the Issuer whose performance depends on a notional basket ("Migros Bank Global Quality Select" – the "Underlying"), whose Components are selected by the Investment Manager. Depending on price development, the price of the product may be higher or lower than the Issue price (as defined below). To reduce currency risks, foreign currencies are hedged against CHF by daily FX forwards transactions (FX-Roll).

Underlying: The underlying is a notional basket of sufficiently liquid and tradeable shares and a liquidity component denominated in CHF (cash and cash-like instruments), which does not exceed 50% on an annual average ("underlying components"), actively constituted by the Investment Manager in accordance with their qualified assessment of the market and managed by them during the life of the product in accordance with a discretionary and dynamic investment strategy. Restrictions may apply to the inclusion of eligible underlying components in certain circumstances.

The product replicates the performance of the Underlying. The sum of the weightings of the Underlying components equals 100%. Negative weightings of the underlying components are not permitted. The liquidity component may bear negative interest at the overnight reference rate of the respective currency. Any rebalancing of the Underlying and weighting of the Underlying components ("**Rebalancing**") will be made in accordance with the investment strategy at the average of the prices of the Underlying components obtained by the Issuer. No distributions are made to the investor. The Calculation Agent reinvests the potential net distributed returns (e.g. dividends, interest, or other distributions) from the Underlying components into the Product. This is done by adjusting the weighting of the relevant Underlying components. The reinvestment usually takes place on the ex-dividend date of the respective Underlying component.

The investment strategy, the universe of securities and the rebalancing are defined in more detail in the Final Terms and can be found in the section "Other relevant information" below. The current composition of the Underlying can be found at <https://zertifikate.zkb.ch/EN>.

If an extraordinary event occurs, e.g. with respect to the Underlying the Issuer may at its discretion take all necessary steps and, if necessary, adjust the terms and conditions of the product so that the economic value of the product after the occurrence of the event corresponds as much as possible to the economic value of the product prior to the occurrence of the event.

The liquidity component may bear negative interest at the overnight reference rate of the respective currency.

Calculation method of the redemption amount (Redemption Method): As noted below, the product has a maturity date.

However, the investor can get his investment back early if he exercises his right of return. In addition, the Issuer may redeem the product by exercising his redemption right (see below). In each of these cases, the investor will receive a payment equal to the Final Fixing Value of the Underlying, as determined on the Relevant Exercise Date (see below), less specific fees and multiplied by the Ratio ("**redemption amount**"). You will incur a loss if the redemption amount is lower than the purchase price.

The investor has no entitlements arising from the Underlyings and/or Components of the Underlying (e.g. voting rights and dividends).

Product information

Issue price	CHF 100.00 / 100.00% of the Basket Value on Initial Fixing Date	Final Fixing Level	basis Or on the Relevant Exercise Date.
Denomination	CHF 100.00	Redemption Date (Maturity)	15/07/2027 or 5 Banking Days after the Relevant Exercise Date
Value of the Underlying Ratio	CHF 100.00 on Initial Fixing Date 1 Product corresponds to 1 Underlying(s)	Relevant Exercise Date	Corresponds to the Exercise Date on which the redemption amount is determined as a result of a valid exercise of the Issuer's redemption right or the Investor's right to return.
Trading units	1 debt security(ies)	Redemption right of the Issuer	Yes, as described below
Product Currency	Swiss Franc (CHF)	Right of return of the Investor	Yes, as described below
Currency hedging	Yes (FX-Roll)	Lead Manager/ Calculation Agent	Zürcher Kantonalbank, Zurich
Mode of settlement	cash settlement	Investment Manager	Migros Bank AG
Initial Fixing Date/ Initial Fixing Level	08/07/2022, average of the net prices of the Underlying achieved by the Issuer on a best-effort basis		
Value Date	15/07/2022		
Last Trading Date	07/07/2027		
Final Fixing Date/	08/07/2027, average of the net prices of the Underlying achieved by the Issuer on a best-effort		

Redemption right (of the Issuer): The Issuer has the right, by means of an announcement (declaration of intent), to redeem the outstanding products on any banking day at the Issuer's registered office (the "**Exercise Date**"). On the "**Relevant Exercise Date**", the redemption amount will be determined, which results from the information in the section "Calculation method of the redemption amount". The declaration of intent to exercise the redemption right must be made with a notice period of 366 calendar day(s) via the official publication channel of the SIX Swiss Exchange and on the website of Zürcher Kantonalbank.

Right of return (of the investor): The investor has the right to return the products they hold by submitting a declaration of intent. On the Relevant Exercise Date, the redemption amount will be determined as set out in the "Calculation method of the redemption amount" section. The declaration of intent to exercise the right of return must be received no later than 366 calendar days prior to the respective exercise date, and must be sent directly to Zürcher Kantonalbank, Sales Structured Products, IHHV, P.O. Box 8010 Zurich, or e-mailed to derivate@zkb.ch and communicated via the investor's custodian bank.

The Product also provides that the Issuer may terminate the Product early if certain extraordinary events occur. These events essentially relate to the product, the Issuer and the Underlying. The amount you receive in the event of such an extraordinary early termination is different from the amount you have invested and may be lower. Investors should therefore be prepared to suffer a partial or total loss of their investments. In addition, you bear the risk that notice is given at a time that is unfavourable for you and that you can only reinvest the notice amount on less favorable terms.

Redemption: Repayment due to Redemption by the Issuer or return by the investor will be effected with a value date of five banking days after the relevant exercise date.

Target Market

The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk < 1 2 3 4 5 6 7 > Higher risk

The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 6 on a scale of 1 to 7, where 6 corresponds to risk class the second-highest. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: 15/07/2027 (maturity)

Example Investment:

CHF 10,000.00

If you exit after 1 year

If you exit at the end of the recommended holding period

Scenarios

Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 10200	CHF 11350
	Average return each year	2.04 %	12.14 %
Unfavourable	What you might get back after costs	CHF 10200	CHF 11350
	Average return each year	2.04 %	12.14 %
Moderate	What you might get back after costs	CHF 31060	CHF 35630
	Average return each year	210.63 %	216.95 %
Favourable	What you might get back after costs	CHF 93650	CHF 107020
	Average return each year	836.47 %	760.44 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the invested capital is possible. As an uncertificated security, the product is not covered by any deposit insurance scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. In particular, the figures are based on reasonable assumptions regarding the incurrance of fees charged for rebalancing the Underlying (representing 0.10% of the relevant notional transaction value) as well as annual fees (an Investment Manager Fee of 0.70% and an Administration Fee of 0.30% annually).

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- CHF 10,000.00 is invested.

	If you exit after 1 year	If you exit at the end of the recommended holding period
Total costs	CHF 182	CHF 404
Cost impact (*)	1.81%	3.26% p.a.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 220.21 % before costs and 216.95 % after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	These costs are included in the price you pay.	CHF 0
Exit costs	0.80% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	CHF 80
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1% of the value of your investment per year.	CHF 100
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 2

How long should I hold it and can I take money out early?

Recommended holding period: 15/07/2027 (maturity) This product is designed to be invested until the maturity date 15/07/2027. However, the product grants the investor a right of return as defined in the Final Terms of the product.

In addition, the investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.

Stock market listing	SIX Swiss Exchange	Last Exchange Trading Day	07/07/2027
Smallest tradeable unit	1 debt security(ies)	Price quotation	quoted in units

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website: <https://zertifikate.zkb.ch/EN>.
