**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type** This product is a debt security in the form of an uncertificated security issued under Swiss law.

**Term** The product has a fixed term and matures on the Redemption Date.

**Objectives** This product is a structured debt instrument issued by the Issuer whose performance depends on a notional basket ("Cyber Security & Cloud Service Basket" – the "Underlying"), whose Components are selected by the Investment Manager. The Title Universe consists of internet, cyber security, big data and cloud services segment. The Underlying constituents are listed at a recognized exchange (World Federation of Exchanges or FESE (Federation of European Securities Exchanges)) Depending on price development, the price of the product may be higher or lower than the Issue price (as defined below).

**Underlying:** The underlying is a notional basket of sufficiently liquid and tradeable shares and a liquidity component denominated in USD ("underlying components"), actively constituted by the Investment Manager in accordance with their qualified assessment of the market and managed by them during the life of the product in accordance with a discretionary and dynamic investment strategy. Restrictions may apply to the inclusion of eligible underlying components in certain circumstances.

The product replicates the performance of the Underlying. The sum of the weightings of the Underlying components equals 100%. Negative weightings of the underlying components are not permitted. Any rebalancing of the Underlying and weighting of the Underlying components ("Rebalancing") will be made in accordance with the investment strategy at the average of the prices of the Underlying components obtained by the Issuer. The potential income attributable to the Underlying components (e.g. dividends, interest or other distributions) is generally reinvested (after deduction of any withholding taxes and duties) by adjusting the weighting of the relevant Underlying components.

The investment strategy, the universe of securities and the rebalancing are defined in more detail in the Final Terms and can be found in the section "Other relevant information" below. The current composition of the Underlying can be found at [www.zkb.ch/finanzinformationen](https://www.zkb.ch/finanzinformationen).

If an extraordinary event occurs, e.g. with respect to the Underlying the Issuer may at its discretion take all necessary steps and, if necessary, adjust the terms and conditions of the product so that the economic value of the product after the occurrence of the event corresponds as much as possible to the economic value of the product prior to the occurrence of the event.

**Calculation method of the redemption amount (Redemption Method):** As noted below, the product has a maturity date.

The Product provides that the Issuer may terminate the Product early if certain extraordinary events occur. These events essentially relate to the product, the Issuer and the Underlying. The amount you receive in the event of such an extraordinary early termination is different from the amount you have invested and may be lower. Investors should therefore be prepared to suffer a partial or total loss of their investments. In addition, you bear the risk that notice is given at a time that is unfavourable for you and that you can only reinvest the notice amount on less favorable terms.

### Target Market

The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a very short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

### What are the risks and what could I get in return?

#### Risk indicator

Lower risk < **1** **2** **3** **4** **5** **6** **7** > Higher risk

**The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 6 on a scale of 1 to 7, where 6 corresponds to risk class the second-highest. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the**

currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**Performance scenarios** What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

**Recommended holding period:** 17/11/2025 (maturity)

**Example Investment:** USD 10,000.00

If you exit at the end of the recommended holding period

Scenarios		
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>	
<b>Stress</b>	<b>What you might get back after costs</b>	<b>USD 1610</b>
	Percentage return	-83.91 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>USD 8130</b>

<b>Moderate</b>	<b>What you might get back after costs</b>	<b>USD 10300</b>
	Percentage return	3.00 %
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>USD 12650</b>
	Percentage return	26.54 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

#### What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

#### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. In particular, the figures are based on reasonable assumptions regarding the incurrence of fees charged for rebalancing the Underlying (representing 0.10% of the relevant notional transaction value) as well as annual fees (an Investment Manager Fee of 0.40% and an Administration Fee of 0.30% annually).

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- USD 10,000.00 is invested.

	<b>If you exit at the end of the recommended holding period</b>
<b>Total costs</b>	USD 34
<b>Cost impact (*)</b>	0.34%

(\*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

#### Composition of costs

<b>One-off costs upon entry or exit</b>		<b>If you exit at the end of the recommended holding period</b>
<b>Entry costs</b>	These costs are included in the price you pay.	USD 5
<b>Exit costs</b>	0.85% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	USD 0
<b>Ongoing costs</b>		
<b>Management fees and other administrative or operating costs</b>	0.7% of the value of your investment per year.	USD 27
<b>Transaction costs</b>	0.05% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 2

#### How long should I hold it and can I take money out early?

**Recommended holding period: 17/11/2025 (maturity)** This product is designed to be invested until the maturity date 17/11/2025. The product does not grant the investor any early right of return. For that reason, investors must be prepared to remain invested for the recommended holding period.

The investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.
