<b>Competent Authority</b>	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 12. September 2025, 23:00 CET.

**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type** This product is a debt security in the form of an uncertificated security issued under Swiss law.

**Term** The product has a fixed term and matures on the Redemption Date.

**Objectives** The aim of this product is to give the investor the prospect of an increased return with the simultaneous risk of a partial or complete loss of the capital invested. It is primarily aimed at investors who expect a decreasing volatility of the Underlyings and expect the value of the product at maturity will be at the same level or above the respective Cap Level. The investor purchases the product at a discount and does not benefit if the closing price of the Underlyings is above the corresponding Cap Level.

The amount of the repayment depends on the performance of the Underlyings on the Final Fixing Date. In detail:

- If no Knock-in Event occurs: The product is repaid in the amount of the Denomination; or
- If a Knock-in Event occurs and
  - if the Final Fixing Value of each Underlying is at or above its Cap Level: The product is repaid in the amount of the Denomination; or
  - if the Final Fixing Value of at least one Underlying is below its Cap Level: The product is repaid by delivering the Underlying with the worst performance (between the Initial Fixing Date and the Final Fixing Date), i.e. the redemption amount is linked to the negative performance of the Underlying with the worst performance. The number of Underlyings to be delivered per Denomination is defined according to the Ratio. Remaining fractions are not delivered but settled in cash. In such a case, the investor suffers a loss if the value of the delivered Underlying on the Redemption Date, including the compensation payments (for fractions of the Underlying), is lower than the amount invested by the investor.

A Knock-in Event occurs when the value of at least one Underlying touches or falls below the Knock-in Level during the Knock-in Level Observation Period.

The investor has no entitlements arising from the underlyings and/or components of the underlying (e.g. voting rights and dividends).

The risk and return profile of the product described above will change if the product is sold before the Redemption Date.

### Product information

<b>Product Currency</b>	Swiss Franc (CHF)	<b>Knock-in Level</b>	Underlying
<b>Currency Hedging</b>	No		80.00% of the initial fixing value of each
<b>Mode of settlement</b>	Cash or physical settlement	<b>Trading units</b>	Underlying
<b>Value Date</b>	31/10/2024	<b>Ratio</b>	1 debt security(ies)
<b>Last Trading Date</b>	24/10/2025	<b>Knock-in Level</b>	Denomination/Cap Level
<b>Redemption Date</b>	31/10/2025	<b>Observation Period</b>	From 24/10/2024 (inclusive) to 24/10/2025
<b>(Maturity)</b>		<b>Worst-performing</b>	(inclusive)
<b>Denomination</b>	CHF 50,000.00	<b>Underlying</b>	The Underlying for which dividing the Final Fixing
<b>Issue price</b>	CHF 44,925.00		Value by the Cap Level results in the lowest value.
<b>Maximum Yield</b>	11.2966% for the entire duration		
<b>Cap Level</b>	100.00% of the Initial Fixing Value of each		

### Underlying data

Underlying	Initial Fixing Date	Initial Fixing Value	Final Fixing Date	Final Fixing Value	Cap Level	Knock-in Level	Ratio
Nestlé SA	24/10/2024	CHF 84.82	24/10/2025	Closing price on SIX Swiss Exchange on 24/10/2025	CHF 84.82	CHF 67.856	589.483612
Lindt & Sprüngli AG	24/10/2024	CHF 10,530.00	24/10/2025	Closing price on SIX Swiss Exchange on 24/10/2025	CHF 10,530.00	CHF 8,424.00	4.748338
Novartis AG	24/10/2024	CHF 98.24	24/10/2025	Closing price on SIX Swiss Exchange on 24/10/2025	CHF 98.24	CHF 78.592	508.957655

According to the product terms and conditions, in case of an extraordinary event adjustments may be made to the product and the Issuer may terminate the product early. These events are specified in the product terms and conditions, and mainly relate to the Underlyings, the product and the Issuer. In such cases, the redemption amount may be significantly lower than the purchase price. The Investor should therefore be prepared to accept a partial or total loss of his investments. In addition, the investor bears the risk of a termination at a time that is unfavourable for him and that he can only reinvest the redemption amount at less favourable conditions.

**Target Market** The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a very short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

## What are the risks and what could I get in return?

### Risk indicator

Lower risk

2

3

4

5

6

7

>

Higher risk

**The risk indicator assumes you keep the product until maturity. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 5 on a scale of 1 to 7, where 5 corresponds to risk class a medium-high. This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**Performance scenarios** What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

**Recommended holding period:** 31/10/2025 (maturity)

**Example Investment:** CHF 10,000.00

If you exit at the end of the recommended holding period

#### Scenarios

**Minimum** There is no minimum guaranteed return. You could lose some or all of your investment.

**Stress** What you might get back after costs

CHF 7038

Percentage return

-29.62 %

**Unfavourable** What you might get back after costs

CHF 8268

Percentage return

-17.32 %

**Moderate** What you might get back after costs

CHF 10316

Percentage return

3.16 %

**Favourable** What you might get back after costs

CHF 10316

Percentage return

3.16 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

## What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).

- CHF 10,000.00 is invested.

	If you exit at the end of the recommended holding period
<b>Total costs</b>	CHF 41
<b>Cost impact (*)</b>	0.41%

(\*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

### Composition of costs

One-off costs upon entry or exit		If you exit at the end of the recommended holding period
<b>Entry costs</b>	These costs are included in the price you pay.	CHF 41
<b>Exit costs</b>	0.41% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	CHF 0
<b>Ongoing costs</b>		
<b>Management fees and other administrative or operating costs</b>	There are no other ongoing costs for this product.	n/a
<b>Transaction costs</b>	There are no transaction costs for this product.	n/a

### How long should I hold it and can I take money out early?

**Recommended holding period: 31/10/2025 (maturity)** The objective of this product is to provide the investor with the entitlement described above under "What is this product?" provided the product is held to maturity.

The investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.

<b>Stock market listing</b>	SIX Swiss Exchange	<b>Last Exchange Trading Day</b>	24/10/2025
<b>Smallest tradeable unit</b>	1 debt security(ies)	<b>Price quotation</b>	quoted in units

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

### How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to [documentation@zkb.ch](mailto:documentation@zkb.ch) or visit our website [www.zkb.ch/finanzinformationen](http://www.zkb.ch/finanzinformationen).
