You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term The product has a fixed term and matures on the Redemption Date. You have the right to redemption of a redemption amount depending on the performance of the Underlying on specified dates, provided that either the Issuer exercises its Redemption right or you exercise your Right of return (as defined below).

Objectives The objective of this product is to give you the option of participating indefinitely in the positive performance of the underlying components of a basket ("on an international Dividendbasket CHF" – the "Underlying", see below), less certain fees and costs (as specified below). The product replicates the performance of the Underlying, taking into account the weighting of the individual underlying components contained therein, and is therefore comparable to a direct investment in the underlying components in terms of risk. By investing in this product, investors expect an uptrend in the underlying components. Depending on price development, the price of the product may be higher or lower than the Issue price (as defined below).

Composition of the Underlying: Allianz SE (ISIN: DE0008404005, Weighting: 2.54%) / AXA SA (ISIN: FR0000120628, Weighting: 2.52%) / Bank of Nova Scotia (ISIN: CA0641491075, Weighting: 3.34%) / BASF SE (ISIN: DE000BASF111, Weighting: 2.36%) / BCE Inc (ISIN: CA05534B7604, Weighting: 2.22%) / BNP Paribas (ISIN: FR0000131104, Weighting: 2.72%) / Brookfield Renewable Corporation (ISIN: CA11285B1085, Weighting: 3.34%) / CVS Caremark Corp (ISIN: US1266501006, Weighting: 2.47%) / Danske Bank AS (ISIN: DK0010274414, Weighting: 3.21%) / Deutsche Telekom AG (ISIN: DE0005557508, Weighting: 2.02%) / Edison International (ISIN: US2810201077, Weighting: 2.64%) / Enbridge Inc (ISIN: CA29250N1050, Weighting: 2.61%) / ENEL SpA (ISIN: IT0003128367, Weighting: 3.21%) / Engie SA (ISIN: FR0010208488, Weighting: 3.84%) / Fortescue Metals Group Ltd (ISIN: AU000000FMG4, Weighting: 3.07%) / Helvetia Baloise Holding AG (ISIN: CH0466642201, Weighting: 2.97%) / HSBBC Holdings (ISIN: GB0005405286, Weighting: 3.42%) / ING Groep NV (ISIN: NL0011821202, Weighting: 3.06%) / Intesa Sanpaolo SpA (ISIN: IT0000072618, Weighting: 2.78%) / Legal & General Group PLC (ISIN: GB0005603997, Weighting: 2.44%) / Manulife Financial Corp (ISIN: CA56501R1064, Weighting: 2.79%) / Mapfre SA (ISIN: ES0124244E34, Weighting: 3.43%) / NN Group N.V. The potential income attributable to the Underlying components (e.g. dividends, interest or other distributions) is distributed to the investor by means of periodic compensatory payments (after deduction of any withholding taxes and duties). The compensatory payments occur annually, for the first time on 05. March 2026 (modified following business day convention).

Calculation method of the redemption amount (Redemption Method): As noted below, the product has a maturity date.

However, the investor can get his investment back early if he exercises his right of return. In addition, the Issuer may redeem the product by exercising his redemption right (see below). In each of these cases, the investor will receive a payment equal to the sum of the weighted value of the underlying components, as determined on the Relevant Exercise Date (see below), converted where applicable into the product currency, less specific fees and multiplied by the Ratio ("redemption amount"). You will incur a loss if the redemption amount is lower than the purchase price.

Compensatory payments: The potential returns (e.g., dividends, interest, or other distributions) accruing on the Underlying components are paid out (PayoutFrequencyType)) by the Calculation Agent after deduction of any applicable withholding taxes and charges. These compensatory payments are deducted from the certificate value and thus reduce participation in the performance of the Underlying. The compensatory payments are paid out on the respective distribution dates, but only if the value of the certificate on the relevant valuation date is greater than the corresponding distribution.

Initial Fixing Date/ Initial Fixing Level	18/03/2025, average of the net prices of the Underlying components achieved by the Issuer on a best-effort basis, converted into the product currency at the exchange rate(s) prevailing at that time.		

Redemption right (of the Issuer): The Issuer has the right, by means of an announcement (declaration of intent), to redeem the outstanding products on any banking day at the Issuer's registered office (the "Exercise Date"). On the "Relevant Exercise Date", the redemption amount will be determined, which results from the information in the section "Calculation method of the redemption amount". The declaration of intent to exercise the redemption right must be made with a notice period of 366 calendar day(s) on the official publication channel of the SIX Swiss Exchange as well as on the website of Zürcher Kantonalbank.

Right of return (of the investor): The investor has the right to return the products they hold by submitting a declaration of intent. On the Relevant Exercise Date, the redemption amount will be determined as set out in the "Calculation method of the redemption amount" section. The declaration of intent to exercise the right of return must be received no later than 366 calendar days prior to the respective exercise date, and must be sent directly to Zürcher Kantonalbank, Sales Structured Products, IHHV, P.O. Box 8010 Zurich, or e-mailed to derivate@zkb.ch and communicated via the investor's custodian bank. The Product also provides that the Issuer may terminate the Product early if certain extraordinary events occur. These events essentially relate to the product, the Issuer and the Underlying. The amount you receive in the event of such an extraordinary early termination is different from the amount you have invested and may be lower. Investors should therefore be prepared to suffer a partial or total loss of their investments. In addition, you bear the risk that notice is given at a time that is unfavourable for you and that you can only reinvest the notice amount on less favorable terms.

Redemption: Repayment due to Redemption by the Issuer or return by the investor will be effected with a value date of five banking days after the relevant exercise date.

Target Market

The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk < **1** **2** **3** **4** **5** **6** **7** > Higher risk

The risk indicator assumes you keep the product until maturity. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 4 on a scale of 1 to 7, where 4 corresponds to risk class a medium. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: 24/03/2028 (maturity)

Example Investment: CHF 10,000.00

		If you exit after 1 year	If you exit at the end of the recommended holding period
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 3330	CHF 3970
	Average return each year	-66.72 %	-39.32 %
Unfavourable	What you might get back after costs	CHF 3330	CHF 3970
	Average return each year	-66.72 %	-39.32 %
Moderate	What you might get back after costs	CHF 14120	CHF 20370
	Average return each year	41.21 %	46.90 %
Favourable	What you might get back after costs	CHF 61220	CHF 101190
	Average return each year	512.15 %	249.55 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the invested capital is possible. As an uncertificated security, the product is not covered by any deposit insurance scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10,000.00 is invested.

	If you exit after 1 year	If you exit at the end of the recommended holding period
Total costs	CHF 80	CHF 10
Cost impact (*)	0.80%	0.08% p.a.

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 46.98 % before costs and 46.90 % after costs.

Composition of costs

One-off costs upon entry or exit	If you exit after 1 year
Entry costs	These costs are included in the price you pay. This includes distribution costs of 0.08% p.a. CHF 10
Exit costs	0.70% of your investment before it is paid out to you. These costs only apply CHF 70

if you exit before maturity of the product.

Ongoing costs taken each year

Management fees and other administrative or operating costs 0% of the value of your investment per year. CHF 0

Transaction costs 0% of the value of your investment per year. CHF 0
This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.

How long should I hold it and can I take money out early?

Recommended holding period: 24/03/2028 (maturity) This product is designed to be invested until the maturity date 24/03/2028. However, the product grants the investor a right of return as defined in the Final Terms of the product.

In addition, the investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.
