**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type** This product is a debt security in the form of an uncertificated security issued under Swiss law.

**Term** The product has a fixed term and matures on the Redemption Date.

**Objectives** The aim of this product is to grant the investor a specific entitlement at predefined conditions. The product has a fixed term and matures on the Redemption Date. Due to the Cap Level the redemption amount is limited to the Maximum Redemption Amount. The redemption modalities are as follows:

- If no Knock-Out Event occurs: The product is redeemed at an amount equal to the maximum of the Bonus Payment or the Denomination multiplied by 100.00% of the positive performance of the Underlying (between Initial Fixing Date and Final Fixing Date), but not more than USD 43.19. I.e. the redemption is proportionately linked to the positive performance of the Underlying.

If a Knock-Out Event occurs: The product will be redeemed at an amount equal to the Denomination multiplied by 90.9091% of the (negative or positive) performance of the Underlying. I.e., the redemption is linked to the performance of the Underlying. In this case, the investor suffers a loss if the redemption amount is lower than the amount invested by the investor.

A Knock-Out Event occurs when the value of the Underlying touches or falls below the Knock-Out Level during the Knock-Out Level Observation Period.

The investor has no entitlements arising from the underlying and/or components of the underlying (e.g. voting rights and dividends).

The risk and return profile of the product described above will change if the product is sold before the Redemption Date.

According to the product terms and conditions, in case of an extraordinary event adjustments may be made to the product and the Issuer may terminate the product early. These events are specified in the product terms and conditions, and mainly relate to the Underlyings, the product and the Issuer. In such cases, the redemption amount may be significantly lower than the purchase price. The Investor should therefore be prepared to accept a partial or total loss of his investments. In addition, the investor bears the risk of a termination at a time that is unfavourable for him and that he can only reinvest the redemption amount at less favourable conditions.

**Target Market** The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a very short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

### What are the risks and what could I get in return?

#### Risk indicator

Lower risk < **1** **2** **3** **4** **5** **6** **7** > Higher risk

**The risk indicator assumes you keep the product until maturity. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 5 on a scale of 1 to 7, where 5 corresponds to risk class a medium-high. This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on**

this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**Performance scenarios** What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

**Recommended holding period:** 20/10/2025 (maturity)

**Example Investment:** USD 10,000.00

		If you exit at the end of the recommended holding period
<b>Scenarios</b>		
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>	
<b>Stress</b>	<b>What you might get back after costs</b>	<b>USD 966</b>
	Percentage return	-90.34 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>USD 8955</b>

<b>Favourable</b>	<b>What you might get back after costs</b>	<b>USD 11641</b>
	Percentage return	16.41 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

#### What happens if Zürcher Kantonalbank Finance (Guernsey) Ltd is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

#### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- USD 10,000.00 is invested.
