

Key Information Document

ZKB Put Warrant on Alcon AG

Purpose This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of the Product	ZKB Put Warrant on Alcon AG
ISIN	CH1446469699 (the product)
Manufacturer	Zürcher Kantonalbank, our website: zkb.ch/finanzinformationen , for more information call us on +41 (0) 44 293 66 65.
Issuer	Zürcher Kantonalbank
Competent Authority	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 06. February 2026, 23:15 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term The product has a fixed term and matures on the Redemption Date.

Objectives The aim of this product is to grant you a specific entitlement at predefined conditions. The product enables you to participate disproportionately in the negative performance of the Underlying in line with the Leverage. As a result, you are exposed to a very high risk of a total loss of your invested capital. The product profits from decrease in the value of the Underlying.

You have the right to exercise the product daily during the Exercise Period (american) and request delivery of the corresponding Underlying from the Issuer. The corresponding written exercise notice must be received by the Exercise Agent no later than 12:00 PM Zurich local time. An exercise notice received later shall be deemed to have been delivered on the next following business day. The product may only be exercised in the Minimum Exercise Quantity, otherwise an exercise is invalid and has no effect.

The redemption of the product is determined as follows:

- If the product is validly exercised within the exercise period, you make delivery of the Underlying to the Issuer five banking days after exercise. In return for this delivery, you will receive from the Issuer an amount equal to the Exercise Price divided by the Ratio.
- If the product is not (validly) exercised but the Final Fixing Value is lower than the Exercise Price, you will receive a cash settlement amount on the Redemption Date, converted where applicable into the product Currency, equal to the difference between the Final Fixing Value and the Exercise Price, divided by the Ratio. You will suffer a loss if the redemption amount is less than the purchase price of the product.
- If the product is not (validly) exercised and if the Final Fixing Value is equal to or higher than the Exercise Price, the product expires worthless and you do not receive any payments. You incur a loss in the amount of the purchase price of the product.

You have no entitlements arising from the Underlying and/or Components of the Underlying (e.g. voting rights and dividends).

Product information

Type	Put	(Maturity)	
Product Currency	Swiss Franc (CHF)	Issue price	CHF 0.86
Mode of settlement	physical	Exercise Price	CHF 76.00

Underlying	Initial Fixing Date	Initial Fixing Value	Final Fixing Date	Final Fixing Value
Alcon AG	19/05/2025	CHF 73.96	19/06/2026	Closing price on SIX Swiss Exchange on 19/06/2026

According to the product terms and conditions, in case of an extraordinary event adjustments may be made to the product and the Issuer may terminate the product early. These events are specified in the product terms and conditions, and mainly relate to the Underlyings, the product and the Issuer. In such cases, the redemption amount may be significantly lower than the purchase price. The Investor should therefore be prepared to accept a partial or total loss of his investments. In addition, the investor bears the risk of a termination at a time that is unfavourable for him and that he can only reinvest the redemption amount at less favourable conditions.

Target Market The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a very short-term investment horizon. This product is intended for investors with extensive knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Lower risk < 1 2 3 4 5 6 7 > Higher risk

The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 7 on a scale of 1 to 7, where 7 corresponds to risk class the highest. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	26/06/2026 (example period)
Example Investment:	CHF 10,000.00

		If you exit at the end of the example period
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs	CHF 0
	Percentage return	-100.00 %
Unfavourable	What you might get back after costs	CHF 2020
	Percentage return	-79.84 %
Moderate	What you might get back after costs	CHF 9530
	Percentage return	-4.73 %
Favourable	What you might get back after costs	CHF 15670
	Percentage return	56.74 %

The scenarios shown represent possible outcomes calculated based on simulations.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the Issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. Thereby the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product and suspend rights of the investors. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0 % annual return).
- CHF 10,000.00 is invested.

	If you exit at the end of the example period
Total costs	CHF 157
Cost impact (*)	1.57%

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

Composition of costs

		If you exit at the end of the example period
One-off costs upon entry or exit		
Entry costs	These costs are included in the price you pay.	CHF 157
Exit costs	-0.95% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	CHF 0
Ongoing costs		
Management fees and other administrative or operating costs	There are no other ongoing costs for this product.	n/a
Transaction costs	There are no transaction costs for this product.	n/a

How long should I hold it and can I take money out early?

Recommended holding period: 1 calendar day (example period) The Product character does not allow any recommendation regarding the holding period. Due to its Leverage, the Product reacts to the smallest price fluctuations of the Underlying and leads to losses or gains within incalculable periods of time. Any recommendation of a holding period would constitute misleading information for speculative investors. For investors who buy the Product for hedging reasons, the holding period depends on the hedging horizon of the individual investor.

The investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.

Stock market listing	SIX Swiss Exchange	Last Exchange Trading Day	19/06/2026
Smallest tradeable unit	1 debt security(ies)	Price quotation	quoted in units

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website www.zkb.ch/finanzinformationen.
