Competent Authority	The Swiss Financial Market Supervisory Authority (FINMA) is responsible for the supervision of Zürcher Kantonalbank with regard to this Key Information Document.

This document was created on 08. October 2025, 02:06 CET.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type This product is a debt security in the form of an uncertificated security issued under Swiss law.

Term The product has a fixed term and matures - subject to early redemption - on 02/02/2026.

Objectives The objective of this Product is to provide the Investor with an entitlement to returns in the form of Coupon Payments which are independent of the performance of the Underlying (the 'Underlying', see table below). The Coupon Payments are equal to 19.55% p.a. of the Denomination and are payable on the Coupon Dates.

Repayment on maturity

If the product has not been repaid early and the investor holds the product until the Redemption Date, the maximum amount that the investor may receive is the redemption amount (as described below) plus the sum of the coupon amounts. The investor does not participate in the positive performance of the Underlying. By investing in the product, the investor will receive a redemption amount equal to 100.00% of the Denomination on the Redemption Date, provided that the Underlying performs favourably for the investor. If the Underlying performs unfavourably for the investor, the redemption amount may be lower. In detail:

- If no Knock-in Event occurs: The product is repaid in the amount of the Denomination; or
- If a Knock-in Event occurs and
 - if the Final Fixing Value of the Underlying is at or above the Cap Level: The product is repaid in the amount of the Denomination; or
 - if the Final Fixing Value of the Underlying is below the Cap Level: The product is repaid by delivering the Underlying, i.e. the redemption amount is linked to the negative performance of the Underlying. The number of Underlyings to be delivered per Denomination is defined according to the Ratio. Remaining fractions are not delivered but settled in cash. In such a case, the investor suffers a loss if the value of the delivered Underlying on the Redemption Date, including the compensation payments (for fractions of the Underlying) and the Coupon Payments, is lower than the amount invested by the investor.

A Knock-in Event occurs when the value of the Underlying touches or falls below the Knock-in Level during the Knock-in Level Observation Period.

If the investor purchases the product during the term, he does not pay any additional accrued interest because this is included in the trading price ("dirty price"). The investor has no entitlements arising from the underlying and/or components of the underlying (e.g. voting rights and dividends).

The risk and return profile of the product described above will change if the product is sold before the Redemption Date.

Product information

Product Currency	Swiss Franc (CHF)	Call Level	100.00% of the Initial Fixing Value of the Underlying
Currency Hedging	No	Trading units	CHF 1,000
Mode of settlement	Cash or physical settlement	Ratio	Denomination/Cap Level
Value Date	31/07/2025	Coupon	19.55% p.a. of Denomination
Last Trading Date	26/01/2026	Coupon Dates	29/08/25, 30/09/25, 31/10/25, 28/11/25, 31/12/25 and 02/02/26

Denomination	CHF 1,000	Knock-in Level	From 24/07/2025 (inclusive) to 26/01/2026 (inclusive)
Issue price	100.00% of Denomination	Observation Period	
Cap Level	100.00% of the Initial Fixing Value of the Underlying		
Knock-in Level	80.00% of the Initial Fixing Value of the Underlying		

Underlying data

Underlying	Initial Fixing Date	Initial Fixing Value	Final Fixing Date	Final Fixing Value	Cap Level	Knock-in Level	Call Level	Ratio
Comet Holding AG	24/07/2025	CHF 269.00	26/01/2026	Closing price on SIX Swiss Exchange on 26/01/2026	CHF 269.00	CHF 215.20	CHF 269.00	3.717472

The product provides for an automatic early redemption prior to the Redemption Date if the value of the Underlying closes at or above the Call Level on an Observation Date. In such cases, the product is repaid on the respective Early Redemption Date at the Denomination plus the Coupon payment for the relevant period. The investor is not entitled to any further Coupon payments.

According to the product terms and conditions, in case of an extraordinary event adjustments may be made to the product and the Issuer may terminate the product early. These events are specified in the product terms and conditions, and mainly relate to the Underlyings, the product and the Issuer. In such cases, the redemption amount may be significantly lower than the purchase price. The Investor should therefore be prepared to accept a partial or total loss of his investments. In addition, the investor bears the risk of a termination at a time that is unfavourable for him and that he can only reinvest the redemption amount at less favourable conditions.

Target Market The product is aimed at Retail investors who are pursuing the objective of general asset accumulation and optimisation and have a short-term investment horizon. This product is intended for investors with extended knowledge and/or experience of financial products. The investor may bear losses up to a total loss of the invested capital and places no value on capital protection.

What are the risks and what could I get in return?

Risk indicator

Higher risk

The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product in the risk class 6 on a scale of 1 to 7, where 6 corresponds to risk class the second-highest. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you. **If the currency of the country in which you purchase this product or of the account to which sums paid on this product are credited differs from the currency of the product, please be aware of the currency risk. You will receive payments in a different currency so your final return will depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator given above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: Until the product is called or matures. This may be different in each scenario is indicated in the table.

Example Investment: CHF 10,000.00

If you exit at call or maturity

The scenarios shown represent possible outcomes calculated based on simulations. In the case of an early redemption, it has been assumed that no reinvestment has occurred.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Zürcher Kantonalbank Finance (Guernsey) Ltd is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. A total loss of the capital invested is possible. As a debt instrument, the product is not subject to any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- CHF 10,000.00 is invested

- a performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date 31/10/2025	If the product reaches maturity
	CHF 6	CHF 6
Cost impact (*)	0.06 %	0.06 %

(*) This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products.

Composition of costs

One-off costs upon entry or exit

		If you exit at the end of the recommended holding period
Entry costs	These costs are included in the price you pay.	CHF 6
Exit costs	1.02% of your investment before it is paid out to you. These costs only apply if you exit before maturity of the product.	CHF 0

Ongoing costs

Management fees and other administrative or operating costs	There are no other ongoing costs for this product.	n/a
Transaction costs	There are no transaction costs for this product.	n/a

How long should I hold it and can I take money out early?

Recommended holding period: 02/02/2026 (maturity) The objective of this product is to provide the investor with the entitlement described above under "What is this product?" provided the product is held to maturity. The actual holding period may vary depending on the autocallable structure of the product.

The investor has the option to redeem the product by selling the product through the stock exchange on which the product is listed or by selling the product over-the-counter to the product manufacturer. The product manufacturer will endeavor to publish bid and ask prices for the product under normal market conditions on each banking day, but is not legally required to do so. If you sell the Product before the end of the recommended holding period, the amount you then receive may be less than the amount you would otherwise have received, even substantially.

Stock market listing	SIX Swiss Exchange	Last Exchange Trading Day	26/01/2026
Smallest tradeable unit	CHF 1,000	Price quotation	quoted in per cent

In exceptional market situations or in the event of technical malfunctions, it may be temporarily difficult or impossible to purchase or sell the product.

How can I complain?

Complaints about the person advising on or selling the product may be addressed directly to that person via the relevant website. Complaints regarding the product (terms and conditions), this document or the conduct of the product manufacturer can be addressed by post to Zürcher Kantonalbank, P.O. Box, 8010 Zurich or by e-mail to documentation@zkb.ch or visit our website www.zkb.ch/finanzinformationen.
